BEVERLY INDEX LLC — CONFIDENTIAL

NOUS Cognitive Intelligence Platform

Comprehensive catalog of every engine, module, pathway, and capability across the NOUS ecosystem — from dream extraction to clinical surveillance, forensic authentication to treatment intelligence, prenatal monitoring to mortality forecasting, and real-time streaming analysis of live conversations.

EXTRACTION & ANALYSIS ENGINES

7 features — The foundational processing layer

◈ CORE · PATENT PENDING

REMIEL Extraction Engine

Multi-channel linguistic feature extraction from dream narratives, spoken language, and written text. The foundational processing layer that feeds all downstream engines.

▼9 CAPABILITIES

◉ FOUNDATIONAL · NOVEL THEORY

NOST — Neural Oscillation Signature Theory

Theoretical framework mapping linguistic features to predicted neural oscillatory band profiles. The scientific foundation upon which all NOUS classification rests.

▼8 CAPABILITIES

◇ DYNAMIC · PROTOCOL-AWARE

AAE — Adaptive Assessment Engine

Dynamically adjusts interview protocols, question sequencing, and assessment parameters based on real-time subject responses and pathway requirements.

▼7 CAPABILITIES

PRE-PUBLICATION — PUBLISH-ACCESS

BIOMETRIC REAL-TIME

VOCA — Vocal-Onset Cognitive Architecture

Voice-based cognitive assessment and biometric monitoring. Captures vocal biomarkers, speech patterns, and prosodic features that reveal cognitive and emotional states invisible to text analysis alone.

▼10 CAPABILITIES

CULTURAL MULTILINGUAL

LOGOS — Language-Origin Geographic Operating System

Cultural and linguistic calibration system that adjusts all NOUS engines for cultural context, language of origin, idiomatic patterns, and demographic norms.

▼8 CAPABILITIES

PIPELINE MODULAR

R2X — REMIEL-to-Extraction Suite

The complete processing pipeline that orchestrates feature extraction, transformation, and delivery from raw linguistic input to structured NOSS vectors.

▼7 CAPABILITIES

STREAMING LIVE DEPLOYMENT

RTCA — Real-Time Call Analysis

Extends the entire NOUS pipeline — REMIEL, NOST, NOSS — into streaming mode for live audio analysis of phone calls, telehealth sessions, and conversations. Every call becomes a clinical instrument.

▼8 CAPABILITIES

NARRATIVE & VISUALIZATION ENGINES

3 features

Dream processing, memory architecture, and cognitive mapping

DREAM ANALYSIS NARRATIVE

DreamWeaver

Specialized dream narrative processing engine that extracts psychological content, symbolic patterns, and clinical indicators from dream reports following REMIEL protocols.

▼8 CAPABILITIES

MEMORY LONGITUDINAL

Memoria Sonata

Memory architecture engine that maps autobiographical memory quality, episodic specificity, and temporal coherence across longitudinal assessments.

▼8 CAPABILITIES

3D INTERACTIVE

Empyrean Visualization Engine

Three-dimensional cognitive state visualization that renders NOSS sector activations as an interactive orbital system. The visual signature of each patient's cognitive architecture.

▼8 CAPABILITIES
